strategic writing done *for* you

Combining creativity with strong project management to help you **reach your goals.**

Email Marketing Platform

Making it easy to create, send, and optimize your email marketing campaigns.

How it works

Contacts

Easily upload your contacts and house them in the online portal. The system automatically removes duplicates and updates existing contacts with new information.

DRAG AND DROP IMPORTING

Adding new subscribers is as easy as dropping them on the app, no matter what format they're in. We'll automatically scan and remove duplicates so you don't have to.

Set up forms on your website so people can enter their contact information and get automatically added to your email list.

Design

- Use branded emails instead of plain text. Choose from a range of designs with flexible layouts to create truly unique looking emails that will work everywhere. (Custom designs are also easy to create within the platform.)
- All campaigns are optimized for mobile use.
- Test your emails before sending, so you can see how they will look across 20+ email platforms.
- Show subscribers you care by using dynamic content to personalize email campaigns for them.

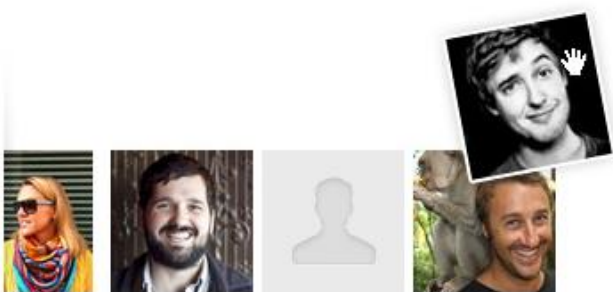

Social Sharing

Our social sharing feature makes it easy for your subscribers to share your campaigns on **Twitter** and **Facebook**. With a single click you can add a "Like" or "Tweet" button to your campaign and it's ready to be shared.

We'll show you a [detailed report](#) on which subscribers shared your campaigns, and even what they said about you when they did it.

Sending

- Run campaigns through spam filters at the desktop, server, and firewall level to help ensure your emails get delivered.
- Include links in the emails to track open and click-through rate.
- Send to your entire contact list with one email or target subscribers using data you have about them.

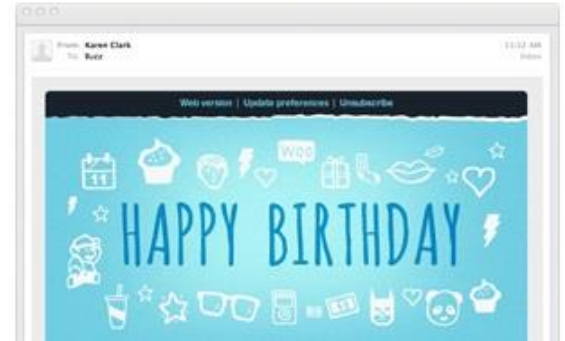

SEGMENTS

Target your campaigns like a laser. Send only to the people who opened your last 3 campaigns. Only send to people from a certain country, or who might be interested in a particular topic.

Autoresponders

Autoresponders make it easy to stay in touch with your subscribers without lifting a finger. Quickly build and schedule automated welcome messages, birthday greetings and other date-based campaigns. Send single emails or a sequence over time.

-  When a subscriber joins your list
-  The anniversary of a custom field
-  An exact date

Reporting

Insightful Analytics

Every time you send a campaign we provide a beautiful set of real-time reports allowing you to see who opened it, what they were interested in, who they shared it with and much more.

See who unsubscribed, and whose emails got bounced. The system automatically takes care of the rest, either by removing an unsubscribed person from your list, or by re-sending your email if it bounced.

A/B Testing

Our automatic A/B testing feature makes it easy to test different subject lines, sender details and even totally different email designs. Tell us what to test, how you want us to pick the winner and we'll do the rest.

The best part is, it takes a few clicks to set up and you learn something about your audience every time you do it.

Mobile Reporting

Real-time campaign and subscriber reporting in your pocket

The image displays two mobile reporting dashboards. The left dashboard, titled 'ABC Widgets', shows '3 new updates' and a list of subscribers with their names, email addresses, and last activity times. The right dashboard, titled 'August Newsletter', shows activity metrics for 'OPENS' (24% and 38,112) and 'CLICKS' (15% and 5,662), along with a list of subscribers.
